# What is End-to-End (E2E) Testing?

End-to-End Testing is one of several processes that IRP Student is using to ensure the new student information system (Workday Student) works as expected. During the E2E Testing, identified community testers apply their professional knowledge and understanding to test multiple variations of their day-to-day tasks and actions in the new system.
Testers will identify any "bugs or errors" and will provide feedback on the new system in a structured way.
End-to-End Testing results will be used as empirical evidence for the Go Decision.

End-to-End Testing Timeline

LAUNCH 01. INITIATE
May 10 Stage 1 Testing Begins

LAUNCH 02. ACTIVATE
June 7 Stage 2 Testing Begins

June Testing Continues

July Results Tabulated

GO / NOT YET
July GO DECISION

Who is included in Testing

Business Analysts **+** Business Leads **+** Subject Matter Experts **+** Quality Assurance Specialists **+** Community Testers

Testing will be carried out under the guidance of the IRP Student team and will consist of 10 multidisciplinary pods

KEY TAKE AWAYS

- E2E Testing is a formal process that tests functionality and ensures business processes work as intended from start to finish
- This process includes identifying, fixing, and retesting issues to ensure critical items are resolved and non-critical items are logged for future
- All user interfaces, integrations, and data sets are included in testing
- Testing will begin in May for Launch 1 and June for Launch 2
- Community testers were nominated by the Transition Network and were selected for their expertise
- E2E Testing will provide empirical evidence for the Go Decision (see Go Decision Snapshot)
- E2E testing is not the only testing happening for the new system (see Testing Snapshot)
- Non-critical and additional testing to continue through to August 2023 for Launch 1 and January 2024 for Launch 2
- E2E is not user training. Training is coming, and users will be able to interact with Workday Student before it launches
